

CodeExcellence:

The Next Generation of SAP Code Quality Monitoring and Governance Management

HIGHLIGHTS

- Continuous monitoring of custom ABAP code;
- Rapid, objective assessment of business risks;
- Greater SAP application stability, performance and integrity;
- Reduced upgrade and maintenance costs;
- Rigorous governance over outsourced and internal teams is made possible;
- Improved compliance to corporate coding standards.

The Health Of SAP Applications Is Vital To The Well-Being Of Your Business.

Organizations are highly vulnerable to the business risks associated with application code quality. ERP systems provide tremendous value, but they can be complex and expensive to implement. By addressing code quality assurance earlier in the software development lifecycle (SDLC), developers can raise the performance of SAP applications and avoid significant risks.

CodeExcellence enables you to proactively identify and remedy issues in the development stage, before they reach QA or production. We help you shift the focus on code quality further “upstream”.

Introducing: CodeExcellence

CodeExcellence is the leading provider of ABAP monitoring and governance management, delivering solutions for highly distributed, dynamic, and agile environments. We *provide* companies with the insight and control needed to raise their SAP application performance, *develop* code more efficiently, *troubleshoot* faster and *deliver* more consistent output. Huge volumes of code can be automatically and comprehensively assessed, saving time and allowing re-deployment of highly skilled resources.

Benefits:

- Realize greater SAP application performance and stability;
- Insulate the business against fluctuations in vendor and development team quality;
- Accelerate development team competence while reducing training costs;
- Lower the cost of application maintenance.

With greater visibility, business managers can be confident that their production environments are not vulnerable to code quality defects. IT managers can access dashboard metrics and the technical information needed to control, monitor and improve both applications and development processes for internal as well as outsourced teams. Team leads gain actionable information to mitigate coding issues early in the development process thereby slashing remediation costs.

Powered by SAP NetWeaver

Easily Find Hard-To-Spot, Yet Potentially System Crash-Causing Defects.

Visualize And Monitor All Your ABAP Custom Code.

See the Vulnerability To Your Business.

More Than Just Code Monitoring

CodeExcellence uses the power of software monitoring, analysis and measurement to help leading companies guarantee the highest software quality standards in application development and maintenance. Our Hawkeye products help companies leverage our unique ABAP code monitoring techniques and technology to maximize quality while eliminating code defects like never before.

Hawkeye Assessment

Assess the health and performance of your source code by measuring the overall quality of your asset, and its alignment with your corporate best practices. Easily determine what you should keep, rebuild, or refactor since Hawkeye Assessment will classify all programs according to your corporate quality standards.

Hawkeye Monitor

Hawkeye Monitor sits at the center of CodeExcellence Quality Governance Solution, continuously monitoring all code to identify potentially system crashing software errors. It automatically enforces that the code delivered is consistent and as problem free as possible – during realization, or during sustainment and bug fixes. All development by in-house development teams, outsourced development teams, and software provided by third party suppliers will automatically be monitored to ensure that development is in accordance with coding best practices and governance.

Hawkeye APOD

Increase your developers' productivity by enabling them to build software that is consistent with well-known best practices and your corporate quality software standard policies. Built right into the programmer's workflow, Hawkeye APOD increases efficiency by providing guidance that helps them to easily find and fix their own code defects.

"Our programmer productivity in terms of code quality was instant. **The learning curve was immediate.**"

– IT Director, major transportation company

"With CodeExcellence, I am able to get a **handle on code quality on three major systems and over 2 million lines of code.** I now have the information I need to identify and take action on the biggest problems first."

– Team lead, Financial Services

WHO IS IT FOR?

- Tech leads
- Procurement managers
- Project managers
- Developers
- Architects
- CIOs

PROBLEMS SOLVED

- Automatic and objective 100% code compliance
- Chart long-term trends for the business
- Increased visibility and accountability
- Technical debt management
- Reduced "noise" in QA
- Faster time to market
- Less risk
- Reduced cost
